

Science Teachers' Creative Teaching Workshop by Dr George Forster

3 – 6 September 2007

The Science Teachers' Creative Teaching workshop by Dr George Forster delivered an inspiring session to some 234 Secondary School teachers.

The 1-day workshop started with a half day plenary session on 3 September 2007 with breakout sessions of smaller groups spread out over half day period till 6 September 2007. Dr Forster shared some creative teaching techniques that he has developed over a span of 30 years as a science educator and consultant for gifted programmes in the UK. His presentations covered many discipline of science including physics, biology, chemistry and more. The second half of the session included several hands-on demonstrations which can be used effectively and creatively to bring science alive in the classroom.
